PT120

Platinum 1 mm Flexible Temperature probe

The PT120 represents a significant advancement in temperature sensing technology. Its platinum construction ensures highaccuracy and stability, making it ideal for precision measurement needs. The compact design allows for easy integration into a variety of systems without disturbance, and the quick response time enables real-time monitoring and control.
Functions & Technology

Ideal temperature probe for narrow openings down to 1 mm in diameter
The industry standard PT-100 sensor is precise and stable over a wide temperature range.
PT120 is also particularly useful for controlling heated stages inside dishes and other sensitive heated devices. The probe can be placed on any surface, such as metal, glass, plastic etc.
The probe can also be useful to measure liquids provided that it is placed inside a water-tight pouch.
